TECHNICAL SKILLS

Game Engine: Unity

Programming Languages: C#, C++, Python, Java

Gameplay Systems : State Machines, NavMesh AI, Object Pooling, Enemy AI, Procedural Chunk Generation, Scriptable objects, Inventory System, Health and UI, Unity/Action Events.

Tools: Git, Unity Animator, New Input System, CineMachine, Photoshop, Mixamo.

Programming Concepts: Data Structures and Algorithms, OOPs concepts, Architectural Design, Problem Solving.

EDUCATION

Nitte Meenakshi Institute of Technology | 2021- 2025

B.E in Computer Science & Engineering

INTERNSHIPS

MakeLoop Technology Labs | Feb 2025 - May 2025

Frontend Developer Intern

Developed components for a dynamic Website builder, using React, JavaScript, HTML and CSS. Also, collaborated closely with the backend team to integrate AI-powered features into the website builder.

GAME PROJECTS

Carnival Spin (Game Jam Project)

Unity | C# | Git | CineMachine | Object Pooling

- Developed a physics-driven endless runner centered around momentum-based movement.
- Developed an endless procedural level generation system using reusable chunk prefabs and object pooling.
- Implemented a score system, UI, and gameplay mechanics.

Gameplay Demo: <https://youtu.be/63waVvT1Fkg>

ScrapShot

Unity | C# | State Machine Behaviour | Animation Events

- Created a 2D platformer based around throwing boxes to attack enemies and trigger mechanics.
- Built enemy AI and boss behaviour using Unity State Machine Behaviours.
- Implemented player health, checkpoints, and respawn mechanics.
- Created modular UI systems for health and game state management.

SOFTWARE DEVELOPMENT PROJECTS

AI-Powered Autonomous Vehicle

OpenCV | YOLOv10 | Raspberry Pi | Python | Flask

- Designed and developed an Autonomous Vehicle using Raspberry Pi for real-time navigation and obstacle avoidance.
- Implemented OpenCV for traffic sign detection and Deep Learning algorithms for environment mapping
- Built a web-based control interface with HTML, CSS, and Flask for seamless communication.
- Project was recognized and presented as a research paper at IEEE CONECCT 2025, highlighting its innovation and practical applications.
